

Grow Your People, Grow Your Business

This people-based approach takes the guesswork out of growth by comparing your current state and the “ideal” company for their stage of growth. With the Stages of Growth X-Ray™, you will be able to:

- ✓ Focus on the right things at the right time
- ✓ Predict challenges now and in the future
- ✓ Diagnose the real issues below the surface
- ✓ Reveal hidden agents that may be creating obstacles

The 7 Stages of Growth X-Ray™ offers a unique, one-of-a-kind business approach using a predictive strategic planning process. Using an evidence-based approach, the 7 Stages of Growth was developed by James Fischer and his research of over 650 businesses. Fischer’s research revealed that as a company grows the complexity level increases and that complexity is due to People! A business owner with 1 – 10 employees will have different issues to address than a business owner with 35, 95 or 205 employees.

“

You are helping us tremendously to get ready for Families Together next chapter.
